

Scenario 1

The team has a scheduled daily stand-up at 9 am in the morning. The meetings usually take over an hour.

A lot of time is spent discussing a tricky dependency between several tasks that requires extensive conversation.

Diagnosis: a lot of time spent discussing a tricky dependency

Remedy

Use the time to solve the problem in the topic in the scheduled hour

Scenario 2

In the beginning of the sprint the tasks were picked up by the development team. However, by the middle of the sprint, development team starts to look to Scrum Master to assign tasks to individual developers.

Diagnosis: development team starts to look to scrum master to assign tasks to individual developers.

Remedy : use precisely the scheduled time

Scenario 3

If a development team member needs to discuss a task with the Product Owner, the developer approaches Scrum Master to help set up a meeting with the Product Owner.

Diagnosis: developer approaches scrum master to help set up a meeting the product owner .

Remedy: take time accordingly
